ASSIGNMENT 103 - WENDY NYASHA NAHENGA

A description of three different types of food service, including the basic procedures and equipment.

1. **Tray service style**

-Tray service style is a style of service that does not make the usual dining table but instead dishes and table appointments are arranged in trays, which are brought to the dinner. This is the style used in the serving patients in hospitals or sending meals for the room service.
- In this food and beverage service style type, dishes ordered by guests are neatly arranged on a tray with necessary cutlery and taken to their rooms, beds and seats by waiters.
- Special trays are available to retain the temperature of the dishes.

Healthy and safety points for tray service
- Hold the tray correctly to avoid spills and dropping the food onto to the guests.
- Avoid overloading trays.

The basic procedures
-The big tray must be carried with two hands.
-Place the left hand under the center of the tray with fingers spending out comfortably.
-Implement corrective actions.

Equipment used
- serving platter
- cutlery
-trays

2. French service

-Is a method of serving food.It is also known as family services.In this food service style, large joints, roast poultry, whole fish and so on that have elaborate garnish are neatly arranged on a platter, presented the host, taken back to the sideboard, carved, portioned and served to the guest with spoon and fork. After service, dishes are kept on a hot plate in the sideboard to keep them warm. Each course is served from the sideboard.

Healthy and safety point for french service

-Make sure that the service area is clean, free from physical contaminants and all sorts of contamination as it may cause food poisoning.
- Hand side to help himself / herself.

Basic procedures

-Each food item is served by the server from platters to individual plates
-Guests are served from the left.

Equipment used

-chef's knife
-metal tongs
-cutlery

3. Trolley service/Gueridon service

- Gueridon means side table and restaurants, any work carried out on a side table before the service like making a salad dressing can be termed as gueridon services. Gueridon includes flambe service, it provides visual appeal to the customer.
-it is also named trolley service.
-Dishes are prepared carved, dressed or flamed on a trolley in front of the guests and served with a service spoon and fork.

Healthy safety and hygiene requirements

-Always push the gueridon trolley but do not pull it to help avoid accidents. The gueridon should be kept in one position for the service for the complete course. The trolley should never be kept near the service door so as to avoid obstruction to the waiter.

Basic procedures
-Place the accompanying vegetables, potatoes and garnishes in a chaffing dish or food warmer.
-Ensure that the joint plates are kept warm.
-Carry the plate by holding the rim or edge of the plate.

Equipment used
-Gas stove
-Chaffing dish
-Carving board
